The portfolio is comprised of income producing assets which the firm believes can provide a high probability of generating a positive total return. When the risk-reward in the market appears favorable, the Fund will endeavor to maintain a profile which is designed to participate in market rallies. However, when credit market opportunities appear less favorable, the Fund will maintain a more conservative profile which aims to prevent against principal drawdowns.

Disclosures

Duration is a measure of the sensitivity of the price of a bond or other debt instrument to a change in interest rates. The Bloomberg Barclays Capital US Aggregate Index represents securities that are taxable and dollar denominated. The index covers the US investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. It is not possible to invest directly in an index.

**"Investment grade" refers to fixed income securities that are rated at or above BBB- (or equivalent) based on the average ratings posted by Moody's, S&P and Fitch. "Below Investment grade" refers to fixed income securities that are rated at or below BB+ (or equivalent) based on the average ratings posted by Moody's, S&P and Fitch. If only two of the designated agencies rate a bond, the composite rating is based on an average of the two.

Investors should carefully consider the Fund's investment objectives, risks, charges and expense before investing. The prospectus contains this and other important information about the Fund and may be obtained at www.BramshillFunds.com or by calling (877)-272-6718. Please read the prospectus carefully before investing.

Mutual fund investing involves risk. Principal loss is possible. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investment by the Fund in lower-rated and non-rated securities presents a greater risk of loss to principal and interest than higher-rated securities. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks are greater in emerging markets. Closed-End Funds and ETFs are subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of the shares may trade at a discount to its net asset value ("NAV"), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a Fund's ability to sell its shares. In addition, the Fund may incur higher expenses than if the Fund did not invest in these types of securities. The Fund may make short sales of securities, which involves the risk that losses may exceed the original amount invested.

While the Fund is no-load, management fees and other expenses still apply. Bramshill Investments, LLC is the investment adviser to the Fund. The Fund is distributed by Quasar Distributors, LLC.
