

# BRAMSHILL INCOME PERFORMANCE FUND

INSTITUTIONAL CLASS (BRMSX)

ANNUAL REPORT TO SHAREHOLDERS MARCH 31, 2020

Important Notice: The U.S. Securities and Exchange Commission will permit funds to make shareholder reports available electronically beginning January 1, 2021. Accordingly, paper copies will no longer be mailed. Instead, at that time, the Bramshill Income Performance Fund will send a notice, either by mail or e-mail, each time an updated report is available on the Fund's website (www.bramshillfunds.com). Investors enrolled in electronic delivery will receive the notices by e-mail, with links to the updated report and will not need to take any action. Investors who are not enrolled in electronic delivery by January 1, 2021 will receive the notices in the mail.

All investors who prefer to receive shareholder reports in a printed format may, at any time, choose that option free of charge. Contact your financial intermediary to make this election, or direct investors can call 1-877-BRAMS18.

# BRAMSHILL INCOME PERFORMANCE FUND INVESTOR ANNUAL LETTER (Unaudited)

As we complete the fourth year of performance for the Bramshill Income Performance Fund (BRMSX), the Bramshill Investment team is encouraged by its ability to tactically employ its fixed income strategy in another volatile year of investing. Below, Bramshill has provided a synopsis of the investment landscape for U.S. fixed income during the past four quarters.

As recession fears receded in early 2019, the Fund benefitted from an aggressive reallocation of capital as the investable asset classes of the Fund (investment grade corporate bonds, high yield corporate bonds, US Treasuries, municipal bonds, and preferred securities) entered target ranges. More specifically US high yield corporates and select preferreds, screened at their cheapest levels in years. This reallocation of capital proved beneficial as the 1st half of 2019 was characterized by most asset classes retracing much of their 2018 losses. In early 2019, the probability of loss given the pricing of many of those securities was low in Bramshill's assessment and its investment team began 2019 with a more "risk-on" biased portfolio.

In contrast, as 2019 progressed, the team's assessment of various asset classes and individual securities changed post the large rallies which occurred during the first half of the year. Many securities went from trading at levels deemed cheap to overvalued. Drawdown risks were high entering 4Q19. As a result, Bramshill de-risked both its credit beta and duration exposures over the course of the year and positioned the Fund defensively by the end of 2019.

Bramshill is always highly focused on liquidity both at the portfolio and asset class level. The credit markets have changed significantly over the past five years in many ways and as a result investors must be mindful of shifts in liquidity and the potential for future price gaps. Since 2013 the credit markets have approximately doubled in size based on debt issuance. During this same period, and as a result of Dodd-Frank regulations and other restrictions, the capital commitment at the investment banks and the market-making dealers has decreased by about 50%. From Bramshill's perspective, this is in combination with approximately 40% of the capital committers and traders at these entities not having experienced the 2008 crisis period. There is a huge amount of debt in the marketplace, not enough capital to trade it in an orderly way, and a lack of learned history of how to manage risk during severe price gaps. ETF flows and algorithms are also significantly impacting fixed income liquidity. There has been a substantial expansion with the presence of ETF's in the debt markets. When the flows of their create-and-redeem processes shift, liquidity can change drastically and rapidly. This assessment of liquidity led Bramshill to position defensively when spreads were tight and volatility was likely to increase. This analysis also helped Bramshill to meaningfully position its portfolio more aggressively and be able to allocate risk during such dislocations such as early 2019. Conversely, when this liquidity assessment is combined with a view that asset classes are richly priced (as occurred in late 2019), the Bramshill team positioned the portfolio with defensive stance.

In 1Q20 Bramshill maintained this defensive posture with a 40% allocation to short-term treasuries and cash equivalents. While this defensive positioning proved beneficial and provided a significant cushion during the downturn in most risk assets associated with the COVID-19 pandemic, it did not insulate the Fund from losses. The first quarter of 2020 was the worst for markets since the

Lehman collapse of '08 and was a true "black swan" event. Markets across multiple asset classes moved more violently over a shorter time frame than had ever been seen before. For example, across a five-trading day period from March 13th through March 19th, S&P US Preferred Stock Total Return Index was down -16.25%, Bloomberg Barclays US High Yield Index was off -9.62%, Bloomberg Barclays US Corporate Total Return Index was down -8.30%. These would be historic moves if seen across a calendar year, yet they happened in an unprecedented five days. The combination of levered money, a market driven by fund flows, and a dealer community that did not have balance sheet capacity all contributed to and exacerbated the selloff. All four risk asset classes quickly went from two standard deviations rich (across several of Bramshill's quantitative models) to two standard deviations cheap in a matter of days. These are typically moves that take months (if not years) to play out.

Toward the end of March 2020, the Fed announced several programs in order to stabilize fixed income markets. These programs encompassed over \$2 Trillion of capital and were made available via facilities which ranged from municipal bonds, asset-backed securities, and investment grade bonds (including select recent fallen angels). Through these facilities, the Fed announced its participation in both primary and secondary markets with a specific program targeting front-end Investment Grade corporate debt. These actions by the Fed led Bramshill to implement a "one in / one out" investment approach to the portfolio in which Bramshill gradually upgraded the quality of the portfolio while keeping a large amount of dry powder in order to prepare for further volatility in the coming months. Bramshill targeted lower parts of Investment Grade capital structures at significant discounts to par such as select subordinated bonds and preferreds while avoiding high yield. Bramshill also added front end Investment Grade names trading at significantly wide spreads. The Bramshill investment team believed volatility would likely persist for a while and opportunities would continue to present themselves, therefore Bramshill focused on upgrading the risk/reward profile of the portfolio while maintaining a defensive stance.

Below is a summary of positioning within each sub-asset class within the Fund:

# PREFERRED DEBT

The preferred market was the U.S. fixed income sector where Bramshill saw the best relative value for investing for most of 2019 and remains the Fund's largest exposure. The preferred asset class has a variety of credit options, structure options, yield options, duration options, and liquidity/execution options. Although this asset class typically is ranked below corporate debt and above common equity within a company's capital structure, in 2019 Bramshill was generally not overly concerned about credit quality of most of the regulated financial and utility issuers in the US preferred market. Because the yield and spread pickup was not substantial between long duration perpetual preferred securities and shorter duration fixed to float preferred securities, Bramshill reduced most of its longer duration perpetual preferred allocation in mid-2019. Most of the remaining preferreds allocation was in fixed to floating rate structures which had coupons with Libor floats of +375 to 500. These securities were trading at attractive yields to calls inside of one year or they began floating at significant spreads over Libor. This allocation performed as expected with little price volatility in 2019 and stable yields approaching 5%. Fixed to float preferreds represented approximately 1/3 of the Fund's portfolio in mid-2019 and from a structural standpoint provided limited credit and duration beta. Simply stated, these securities either would likely be called or would float at above-market coupons around par prices.

In 1Q20, US preferred securities (PFDs) had their worst quarter since the 2008 global financial crisis and thus were the largest detractor to our return during that quarter. The S&P U.S. Preferred Stock Index finished down a historic -14.9% as yields/spreads rose significantly. Bramshill warned of the danger in many of the four-handle coupon structures being issued during the fourth quarter of 2019 and avoided those in favor of more defensive securities with high coupons/short calls or higher backend resets. The majority of the Fund's preferred allocation was in defensive structures; however, the market was somewhat indiscriminate during this significant sell-off. The shutdown of the global economy and the fear of the unknown coupled with poor dealer liquidity really exacerbated some of these moves. Furthermore, the collapse in interest rates hurts the banks from a business standpoint; however, it was also an extreme negative to the preferred market as floating rate preferred coupons were marked lower. The Fed moved the target rate from 1.75% to 0.25% in a matter of two weeks causing all front-end rates to collapse. Bramshill reduced certain more cyclical preferred exposure in this period, however, Bramshill believed that bank balance sheets are in much better shape today than they were in 2008. Additionally, the Fed committed to stabilizing the banks as the backbone to the US financial system and the US economy. Bramshill saw value in certain preferreds and in 1Q20 focused on fixed coupons in high quality systematically important institutions. Overall, Bramshill upgraded the Fund's portfolio into these structures as individual opportunities presented themselves.

#### INVESTMENT GRADE CORPORATE BONDS

Investment Grade Corporate bonds (IG) represented approximately 10% allocation of the Fund's assets for most of 2019. IG corporate bonds experienced a solid rally during the period with long US Treasury yields moving lower by over 100 basis points and their spreads over treasuries tightening since the beginning of the year. In hindsight, Bramshill exited this asset class a bit too early as they reduced longer duration credit exposure in the June / July time period. Typically, the Bramshill investment team does not hold positions in what would be termed the "ninth inning" yet this ballgame extended into extra innings. Specifically related to mid-2019 investment grade prices Bramshill did not have many concerns about corporate defaults. At the end of the 3Q19, the Bloomberg Barclays US Corporate Bond index yielded 2.91% and S&P 500® BBB Rated Corporate Bond Index, yielded 3.28%. Somewhat concerning were many BBB-rated corporates which had leverage in the 3.5-4.5 range in late 2019. That type of leverage is typically associated with weak non-investment BB-rated credits. From a pricing standpoint, the majority of this asset class had a higher drawdown probability than Bramshill is accustomed to and therefore the investment team avoided any meaningful exposure here.

In 1Q20, The Bloomberg Barclays Long-duration US Corporate index came under pressure. This market finished the quarter down -4.51%. The yield to maturity (YTM) on this index was two standard deviations rich at 3.08% yield earlier in the year. In a historic move, the index yield rose to 4.96% yield, causing the asset class to transform from rich too cheap in a matter of days. In late March, the Fed announced a series of programs to stabilize the market. Most relevant to IG was the corporate bond purchase program which was mandated to provide liquidity via its primary market credit facility to issuers in need and to ease dysfunction in secondary trading with IG bond purchases (rated BBB- or better) and maturities five years and in. Coupled with the language

"whatever it takes", the Fed stabilized the IG market, issuers came back in record fashion (albeit at wide spreads) and yields rallied lower to 4.12% (YTM on the long duration index). Bramshill sees segments of the IG market as attractive and will continue to add exposure as opportunities present themselves via the new issue market and select relative value opportunities.

#### HIGH YIELD CORPORATE BONDS

The US High Yield index closed 2Q19 at 5.85% yield (+370 spread). While the Bramshill investment team is rarely comfortable with taking high yield corporate bond exposure with yields inside of 6%, Bramshill was neutral in its view of that asset class at that time. Bramshill kept its allocation relatively stable at approximately 10% of the Fund for most of 2019. Certain high yield closed end funds were some of the largest return contributors as these positions benefited from corporate action announcements to close the NAV discount via share buybacks. Distressed securities are not an arena in which the Bramshill investment team focuses. Typically, higherquality non-investment grade BB type of credits are a focus of the Bramshill investment team. That said, CCC-rated securities had a poor total return in 2019 as the result of more individual credit specific negatives more so than a harbinger of an approaching recession. At the end of 3Q19, the Barclays US High Yield index was yielding approximately 5.65% inclusive of exposure to some CCC-rated credits. With a high correlation to movements in the equity indexes and with many securities being moderately capped in upward price appreciation due to call prices, the high yield corporate debt market seemed negatively convex for much of this period. With low historical yields and spreads in US high yield, Bramshill believed this asset class was largely capped on the upside but had equity-like volatility risk on the downside. Bramshill's high yield exposure remained modest in 2019 while the investment team awaited lower prices and a lower probability of loss in that market.

In 1Q20, The Bloomberg Barclays US Corporate High Yield Bond index finished down -12.7% for the quarter as spreads blew out to levels slightly wider than those seen during the 2016 Oil Crash. The High Yield index entered 2020 with a 5.19% yield (+335bps spread) and exploded higher to finish the first quarter at 9.73% yield to worst (YTW) and a +909bps spread over treasuries. In March 2020, Bramshill assessed that the High Yield asset class screened two standard deviations cheap across most of its quantitative models. Spreads north of 900bps have proven to be great entry points for those with a two-year investment horizon. However, Bramshill continued to tread with caution due to likely higher default risk in certain sectors. The double punch of the COVID-19 crisis coupled with the fallout from the Saudis-Russia oil production cuts (Energy represents over 10% of the High Yield Index) caused expected default rates to skyrocket. The majority of the Fund's allocation was in High Yield CEFs which had larger than 12% discounts to NAV. Furthermore, with rates at zero, the cost of funding for these CEFs' leverage decreased thus allowing for higher dividend payouts in the future. Security selection going forward is paramount in High Yield as many sectors face headwinds from the pandemic. Therefore, any meaningful increase in this sector exposure will be accompanied by substantial bottom-up credit work from the Bramshill investment team.

#### MUNICIPAL BONDS

Municipal bonds were one of our largest contributors during 2019, with the majority of that performance derived from the Fund's municipal closed-end fund (CEF) allocation. This was exposure which was taken in late 2018 and early 2019 based on very attractive entry points. Bramshill reduced this exposure from approximately 12% in early 2019 to less than 1% to start 2020. Municipal bonds exhibited similar characteristics to investment grade in the sense that they became extremely overvalued during the course of 2019 (ending the year two standard deviations rich across many of our quant models) with the YTW on the municipal long duration index touching an all-time low of 1.71% earlier that year. Municipal bonds underwent a quick and vicious correction mid-March 2020 (with yields rising to 4.08%), only to snap back partially on the Fed bond buying program announcement (in which municipals were included). In 1Q20, Bramshill took its allocation back up to approximately 5% with the majority of that weighting across municipal bond closed-end funds that were trading at double digit discounts to NAV with tax-exempt yields greater than 5%.

As of March 31, 2020, the 1-year and since inception (4/11/2016) returns for the Fund were - 4.67% and 5.07% (cumulative), respectively, and the 1-year and since inception returns for the Bloomberg Barclays U.S. Aggregate Index were 8.93% and 15.24% (cumulative), respectively. The gross expense ratio for the Fund for the year ended March 31, 2020 was 1.47%\*.

Past performance may not be indicative of future results and there can be no assurance that the Fund will achieve returns comparable to those which it has historically. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance as of the most recent quarter- and month-end may be lower or higher than the performance quoted and can be obtained by visiting our website at www.bramshillfunds.com.

#### FORWARD OUTLOOK

Entering the second quarter of 2020, the Fund's portfolio remains positioned with an above market yield, while invested defensively with a significant amount of "dry powder" prepared to capitalize on opportunities from future market dislocations. While several of the Fund's asset classes, sectors, and securities now screen cheap, Bramshill continues to believe forced selling momentum coupled with extremely poor economic data may provide even better entry points in the future. We believe this setup, coupled with active management at both the asset class and security level will continue to provide the Fund with ample opportunities to significantly outperform fixed income alternatives over time.

This commentary is provided by Bramshill Investments, LLC for informational purposes only and is intended for the use of shareholders of the Bramshill Income Performance Fund (the "Fund").

Mutual fund investing involves risk, including the potential loss of principal. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investment by the Fund in lower-rated and non-rated securities presents a greater risk of loss to principal and interest than higher-rated securities. The Fund invests in foreign securities which involve greater volatility and political, economic

and currency risks and differences in accounting methods. These risks are greater in emerging markets. Closed-End Funds and ETFs are subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of the shares may trade at a discount to its net asset value, an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a Funds ability to sell its shares. In addition, the Fund may incur higher expenses than if the Fund did not invest in these types of securities. The Fund may make short sales of securities, which involves the risk that losses may exceed the original amount invested.

Fund holdings and sector allocations are subject to change and are not recommendations to buy or sell any security. Current and future portfolio holdings are subject to risk "Duration" measures the sensitivity of a fixed-income investment's price to changes in interest rates. Basis point or "bp" refers to 1/100th of 1%, or .01%.

"LIBOR" refers to a benchmark interest rate at which major global lend to one another in the international interbank market for short-term loans. LIBOR, which stands for London Interbank Offered Rate, serves as a globally accepted key benchmark interest rate that indicates borrowing costs between banks. The rate is calculated and published each day by the Intercontinental Exchange (ICE).

"Spreads" refers to the most common definition, the spread is the gap between the bid and the ask prices of a security or asset, like a stock, bond or commodity. This is known as a bid-ask spread.

"Correlation" refers to the finance and investment industries, is a statistic that measures the degree to which two securities move in relation to each other. Correlations are used in advanced portfolio management, computed as the correlation coefficient, which has a value that must fall between -1.0 and +1.0.

Beta ( $\beta$  or beta coefficient) of an investment indicates whether the investment is more or less volatile than the market as a whole. Beta is a measure of the risk arising from exposure to general market movements as opposed to idiosyncratic factors.

Yield to worst is a measure of the lowest possible yield that can be received on a bond that fully operates within the terms of its contract without defaulting. It is a type of yield that is referenced when a bond has provisions that would allow the issuer to close it out before it matures. Early retirement of the bond could be forced through a few different provisions detailed in the bond's contract, most commonly callability. The yield to worst metric is used to evaluate the worst-case scenario for yield at the earliest allowable retirement date. YTW helps investors manage risks and ensure that specific income requirements will still be met even in the worst scenarios.

Yield to maturity (YTM) is the total return anticipated on a bond if the bond is held until it matures. Yield to maturity is considered a long-term bond yield but is expressed as an annual rate. In other words, it is the internal rate of return (IRR) of an investment in a bond if the investor holds the bond until maturity, with all payments made as scheduled and reinvested at the same rate.

Standard deviation is often used as a measure of the risk associated with price-fluctuations of a given asset (stocks, bonds, property, etc.), or the risk of a portfolio of assets (actively managed mutual funds, index mutual funds, or ETFs).

Duration of a financial asset that consists of fixed cash flows, for example a bond, is the weighted average of the times until those fixed cash flows are received.

The Bloomberg/Barclays Capital U.S. Aggregate Index is intended to serve as a comparative indicator of the overall performance relative to the U.S. dollar denominated investment grade fixed

rate taxable bond market. The index currently includes U.S. Treasuries, government related securities, corporate bonds, agency mortgage-backed pass-throughs, consumer asset-based securities, and commercial mortgage-backed securities.

The Bloomberg Barclays US Corporate High Yield Bond Index measures the USD-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. Bonds from issuers with an emerging markets country of risk, based on Barclays EM country definition, are excluded (Future Ticker: I00012US)

Bloomberg Barclays Long U.S. Corporate Index – ETF Tracker The index is designed to measure the performance of U.S. corporate bonds that have a maturity of greater than or equal to 10 years. As of 05/22/2020 ETFs Tracking Other Mutual Funds

It is not possible to invest directly in an index. Indexes are not securities in which direct investments can be made and they do not account for the fees and expenses generally associated with investable products.

S&P US Preferred Stock Total Return Index is designed to serve the investment community's need for an investable benchmark representing the U.S. preferred stock market. Preferred stocks are a class of capital stock that pays dividends at a specified rate and has a preference over common stock in the payment of dividends and the liquidation of assets.

The Bloomberg Barclays US Corporate High Yield Bond Index measures the USD-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. Bonds from issuers with an emerging markets country of risk, based on Barclays EM country definition, are excluded (Future Ticker: I00012US)

The Bloomberg Barclays US Corporate Bond Index measures the investment grade, fixed-rate, taxable corporate bond market. It includes USD denominated securities publicly issued by US and non-US industrial, utility and financial issuers. (Future Ticker: I02765US)

The S&P U.S. Preferred Stock Index is designed to serve the investment community's need for an investable benchmark representing the U.S. preferred stock market. Preferred stocks are a class of capital stock that pays dividends at a specified rate and has a preference over common stock in the payment of dividends and the liquidation of assets.

The S&P 500® BBB Rated Corporate Bond Index, a subindex of the S&P 500 Bond Index, seeks to measure the performance of U.S. corporate debt issued by constituents in the S&P 500 rated 'BBB'. The S&P 500 Bond Index is designed to be a corporate-bond counterpart to the S&P 500, which is widely regarded as the best single gauge of large-cap U.S. equities.

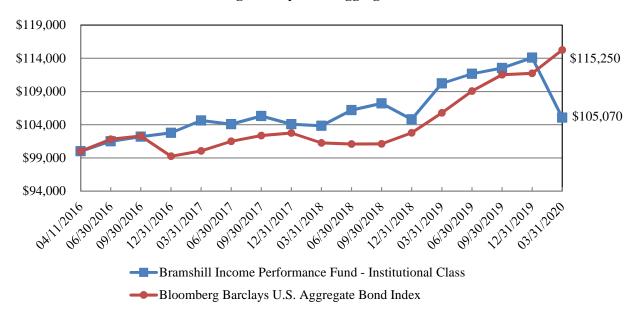

Bramshill Investments, LLC is the investment adviser to the Fund. The Fund is distributed by Quasar Distributors, LLC.

<sup>\*</sup> The gross expense ratio is from the Fund's most recent prospectus.

PERFORMANCE SUMMARY

March 31, 2020 (Unaudited)

# Comparison of a Hypothetical \$100,000 Investment in the Bramshill Income Performance Fund - Institutional Class and Bloomberg Barclays U.S. Aggregate Bond Index

# Investment Returns For the periods ended March 31, 2020

	One Year	Three Year*	Since Inception*
Bramshill Income Performance Fund			
Institutional Class **	-4.67%	0.14%	1.25%
Bloomberg Barclays U.S. Aggregate Bond Index	8.93%	4.82%	3.64%

<sup>\*</sup> Average annualized returns.

<sup>\*\*</sup> Inception date on April 11, 2016.

# EXPENSE EXAMPLE

March 31, 2020 (Unaudited)

As a shareholder of the Fund, you may incur two types of costs: (1) transaction costs; and (2) ongoing costs, including management fees, shareholder servicing fees, and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from October 1, 2019 to March 31, 2020 (the "period").

### **Actual Expenses**

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 equals 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period" to estimate the expenses you paid on your account during the period.

### **Hypothetical Example for Comparison Purposes**

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs such as sales charges (loads). Therefore, the second line of the table is useful in comparing the ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs could have been higher.

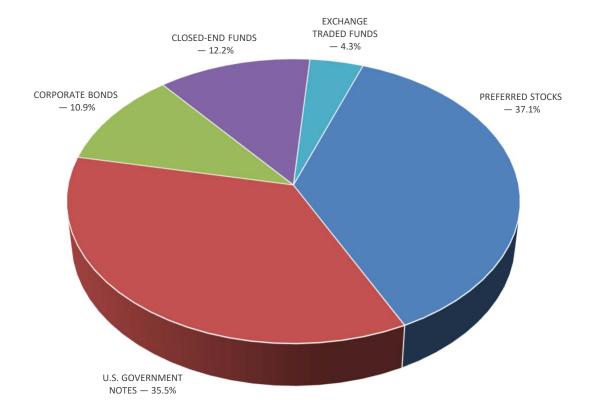

#### **Expenses Paid During the Period**

	Beginning Account Value	Ending Account Value	Paid During the Period <sup>(1)</sup>
Institutional Class Actual Fund Return	\$ 1,000.00	\$ 933.80	\$ 5.17
Hypothetical 5% Return	1,000.00	1,019.65	5.40

<sup>(1)</sup> Expenses are equal to the Fund's annualized expense ratio of 1.07%, multiplied by the average account value over the period, multiplied by 183/366. The expense ratios reflect an expense waiver. Assumes all dividends and distributions were reinvested.

<sup>(1)</sup> Per share amounts have been calculated using average shares method.

<sup>(2)</sup> Not Annualized.

<sup>(3)</sup> Annualized.

<sup>(4)</sup> Includes adjustments in accordance with accounting principles generally accepted in the United States and, consequently, the net asset value for financial reporting purposes and the returns based upon those net asset values may differ from the net asset values and returns for shareholder transactions.

<sup>(5)</sup> The ratios of expenses to average net assets include interest expenses. For the year ended March 31, 2020, excluding interest expenses, the ratio of expenses to average net assets before fees waived/recouped by the Adviser was 1.05%. Excluding interest expenses, the ratio of expenses to average net assets after fees waived/recouped by the Adviser was 1.08%.

<sup>(6)</sup> The ratios of net investment income to average net assets include interest expenses. For the year ended March 31, 2020, excluding interest expenses, the ratio of net investment income to average net assets before fees waived/recouped by the Adviser was 3.19%. Excluding interest expenses, the ratio of net investment income to average net assets after fees waived/recouped by the Adviser was 3.16%.

NOTES TO FINANCIAL STATEMENTS

March 31, 2020

# **Note 1 – Organization**

Bramshill Income Performance Fund (the "Fund") is a diversified series of Trust for Advised Portfolios (the "Trust"). The Trust, a Delaware Statutory Trust, is registered under the Investment Company Act of 1940, as amended (the "1940 Act") as an open-end investment management company. Bramshill Investments, LLC (the "Adviser") serves as the investment manager to the Fund. The inception date of the Fund was April 11, 2016. The investment objective of the Fund is to maximize total return.

# **Note 2 – Significant Accounting Policies**

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. These policies are in conformity with accounting principles generally accepted in the United States of America ("GAAP") for investment companies. The Fund is considered an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board Accounting Standards Codification Topic 946. The presentation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the period reported. Actual results may differ from those estimates.

(a) Securities Valuation – Investments in securities traded on a national securities exchange are valued at the last reported sales price on the exchange on which the security is principally traded. Securities traded on the NASDAQ exchanges are valued at the NASDAQ Official Closing Price ("NOCP"). Exchange-traded securities for which no sale was reported and NASDAQ securities for which there is no NOCP are valued at the mean of the most recent quoted bid and ask prices. Unlisted securities held by the Fund are valued at the last sale price in the over-the-counter ("OTC") market. If there is no trading on a particular day, the mean between the last quoted bid and ask price is used.

Fixed income securities are valued using prices provided by an independent pricing service approved by the Board of Trustees. Pricing services may use various valuation methodologies, including matrix pricing and other analytical models as well as market transactions and dealer quotations.

Futures contracts are valued at the settlement price on the exchange on which they are principally traded.

Various inputs are used in determining the value of the Fund's investments. These inputs are summarized into three broad levels and described below:

**Level 1 -** quoted prices in active markets for identical securities. An active market for the security is a market in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value.

NOTES TO FINANCIAL STATEMENTS

March 31, 2020 (Continued)

**Level 2 -** observable inputs other than quoted prices included in level 1 that are observable for the asset or liability either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

**Level 3** - significant unobservable inputs, including the Fund's own assumptions in determining the fair value of investments.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used to fair value the Fund's investments in each category investment type as of March 31, 2020:

Description	Level 1	Level 2	Level 3	Total
Assets				
Corporate Bonds	\$ -	\$ 45,130,473	\$ - \$	45,130,473
U.S. Government Notes	147,375,059	-	-	147,375,059
Closed-End Funds	50,437,788	-	-	50,437,788
Exchange Traded Funds	17,642,244	-	-	17,642,244
Preferred Stocks	84,299,418	69,649,993	-	153,949,411
Total	\$ 299,754,509	\$ 114,780,466	\$ - \$	414,534,975

See the Schedule of Investments for further detail of investment classifications.

(b) Federal Income Taxes – The Fund has elected to be taxed as a Regulated Investment Company ("RIC") under the U.S. Internal Revenue Code of 1986, as amended, and intends to maintain this qualification and to distribute substantially all net taxable income to its shareholders. Therefore, no provision is made for federal income taxes. Due to the timing of dividend distributions and the differences in accounting for income and realized gains and losses for financial statement and federal income tax purpose, the fiscal year in which amounts are distributed may differ from the year in which the income and realized gains and losses is recorded by the Fund.

Management of the Fund is required to analyze all open tax years, as defined by IRS statute of limitations for all major jurisdictions, including federal tax authorities and certain state authorities. As of and during the year ended March 31, 2020, the Fund did not have a liability for any unrecognized tax benefits. Generally, tax authorities can examine tax returns filed for the preceding three years. As of March 31, 2020, the tax years ended March 31, 2019, March 31, 2018 and the tax period ended March 31, 2017 remain subject to examination. The Fund is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

(c) Return of capital estimates - Distributions received from the Fund's investments in Real Estate Investment Trusts ("REITs") are generally comprised of net investment income, capital gains, and return of capital. Certain of the Fund's investments in Closed-End Funds ("CEFs") also make distributions comprised of net investment income and return of capital. It is the policy of the Fund to estimate the

# NOTES TO FINANCIAL STATEMENTS

March 31, 2020 (Continued)

character of distributions received from underlying REITs based on historical data provided by the REITs and distribution notices provided by CEFs. After each calendar year end, REITs and CEFs report the actual tax character of these distributions. Differences between the estimated and actual amounts reported are reflected in the Funds' records in the year in which they are reported by adjusting related investment cost basis, capital gains and income, as necessary.

- (d) Distributions to Shareholders The Fund records distributions to shareholders, which are determined in accordance with income tax regulations, on the ex-dividend date. Distributions of net investment income, if any, are distributed monthly. The Fund intends to distribute all its net investment income including any cash received from its investments in CEFs and REITs, even if a portion may represent a return of capital. Net realized gains from investment transactions, if any, will be distributed to shareholders annually. The Fund may periodically make reclassifications among certain income and capital gains distributions determined in accordance with federal tax regulations, which may differ from GAAP. These reclassifications are due to differences in the recognition of income, expense and gain (loss) items for financial statement and tax purposes.
- (e) Restricted securities Restricted securities are securities that are not registered for sale under the Securities Act of 1933 or applicable foreign law and that may be re-sold only in transactions exempt from applicable registration. Restricted securities include Rule 144A securities which may be sold normally to qualified institutional buyers. As of March 31, 2020, the Fund had restricted securities, all of which were Rule 144A securities, with a market value of \$16,211,683 or 3.2% of the Fund's net assets.
- (f) Cash Concentration in Uninsured Cash For cash management purposes the Fund may concentrate cash with the Fund's custodian. This typically results in cash balances exceeding the Federal Deposit Insurance Corporation ("FDIC") insurance limits. As of March 31, 2020, the Fund held \$102,494,165 as cash reserves at U.S. Bank, N.A. ("U.S. Bank") and \$1,762,932 as deposits with broker at Wells Fargo Securities, LLC and \$668,565 as deposits with broker at Pershing, LLC that exceeded the FDIC insurance limit.
- (g) Restricted Cash Deposits with Broker At March 31, 2020, the Fund had \$2,012,932 deposited at Wells Fargo Securities, LLC to utilize as collateral for futures trading and \$918,565 deposited at Pershing, LLC to utilize as collateral for securities sold short. The Fund had no open futures and securities sold short positions as of March 31, 2020.
- (h) Futures contracts The Fund invests in futures to adjust its sensitivity to interest rate changes and to gain exposure to U.S. Treasury securities. Some over-the-counter derivative instruments may expose the Fund to the credit risk of its counterparty and may be more volatile than those of other instruments. While hedging strategies involving derivatives can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in other Fund investments. During the year ended March 31, 2020, the average notional amount of futures held by the Fund was (\$4,057,253).

# NOTES TO FINANCIAL STATEMENTS

March 31, 2020 (Continued)

Derivative Investment Holdings Categorized by Risk Exposure – The following table sets forth the Fund's realized and unrealized gain (loss), as reflected in the Statement of Operations, by primary risk exposure and by type of derivative contract for the year ended March 31, 2020:

Amount of Realized Loss on Derivatives					
Risk Exposure Category	Fu	tures Contracts			
Interest rate	\$	(1,395,336)			
Total	\$	(1,395,336)			

Change in Unrealized Gain on Derivatives				
Risk Exposure Category Futures Contracts				
Interest rate	\$	852,293		
Total	\$	852,293		

(i) Other – The Fund records security transactions based on trade date. Realized gains and losses on sales of securities are reported on the basis of identified cost of securities delivered. Dividend income and expense are recognized on the ex-dividend date, and interest income and expense are recognized on an accrual basis. Discounts and premiums on securities purchased are amortized over the lives of the respective securities using the effective yield method. Withholding taxes on foreign dividends have been provided for in accordance with the Trust's understanding of the applicable country's tax rules and rates. Trust-level expenses are allocated across the series of the Trust.

# Note 3 – Investment Management Agreement and Other Transactions with Affiliates

The Trust has an agreement with the Adviser to furnish investment advisory services to the Fund. Under the terms of this agreement, the Fund will pay the Adviser a monthly fee based on the Fund's average daily net assets at annual rate of 0.85%. Pursuant to a contractual fee waiver and reimbursement agreement, the Adviser will waive/reimburse the Fund for expenses in excess of 1.10% of average daily net assets for Institutional Class shares, excluding taxes, interest charges, litigation and other extraordinary expenses, acquired fund fees and expenses, interest and expense relating to short sales, borrowing costs, and brokers' commissions, and other charges relating to the purchase and sale of the Fund's portfolio securities. The Fund incurred \$4,263,860 for Advisory fees during the year ended March 31, 2020.

The Adviser is permitted to recapture amounts waived and/or reimbursed to a Fund within three years if the Fund's total annual operating expenses have fallen to a level below the expense limitation ("expense cap") in effect at the time the fees were earned or the expenses incurred. In no case will the Adviser recapture any amount that would result, on any particular business day of the Fund, in the Fund's total annual operating expenses exceeding the expense cap or any other lower limit then in effect. The Adviser has recaptured \$172,241 of previously waived expenses during the year ended March 31, 2020.

# NOTES TO FINANCIAL STATEMENTS

March 31, 2020 (Continued)

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services ("Fund Services"), serves as the Fund's administrator and fund accountant and transfer agent. The officers of the Trust are employees of Fund Services. U.S. Bank serves as the Fund's custodian and provides compliance services to the Funds. Quasar Distributors, LLC ("Quasar" or the "Distributor") acts as the Fund's distributor and principal underwriter. For the year ended March 31, 2020, the Fund incurred the following expenses for administration and fund accounting, custody, transfer agent and compliance fees:

Administration and fund accounting	\$ 340,581
Transfer Agency	\$ 102,810
Custody	\$ 39,332
Compliance	\$ 15,726

At March 31, 2020, the Fund had payables due to Fund Services and its affiliates for administration and fund accounting, custody, transfer agent and compliance fees to U.S. Bank in the following amounts:

Administration and fund accounting	\$ 63,330
Transfer Agency	\$ 17,257
Custody	\$ 8,800
Compliance	\$ 2,547

The above payable amounts are included in Accrued other expenses and other liabilities in the Statement of Assets and Liabilities.

The Independent Trustees were paid \$11,512 for their services and reimbursement of travel expenses during the year ended March 31, 2020. The Fund pays no compensation to the Interested Trustee or officers of the Trust.

# Note 4 – Control Ownership

The beneficial ownership, either directly or indirectly, of more than 25% of the voting securities of a fund creates presumption of control of the fund under 2(a)(9) of the 1940 Act. As of March 31, 2020, Charles Schwab & Company, Inc. and UBS Financial Services, Inc. held approximately 32% and 25%, respectively, in aggregate for the benefit of others, of the outstanding shares of the Fund.

# **Note 5 – Investment Transactions**

Purchases and sales of investment securities (excluding short-term securities and U.S. government obligations) for the year ended March 31, 2020, were as follows:

Purchases	\$ 432,406,124
Sales	\$ 490.510.044

NOTES TO FINANCIAL STATEMENTS

March 31, 2020 (Continued)

#### Note 6 – Federal Income Tax Information

At March 31, 2020, gross unrealized appreciation and depreciation on investments, based on cost for federal income tax purposes, and the accumulated deficit were as follows:

Tax Cost of Investments	 \$	467,438,798
Unrealized Appreciation		3,244,838
Unrealized Depreciation		(56,148,661)
Net Unrealized Depreciation on Investments		(52,903,823)
Total Accumulated Deficit	 \$	(52,903,823)

The difference between book basis and tax basis unrealized appreciation/depreciation is attributable in part to the tax deferral of losses on wash sales, and basis adjustments on investments in limited partnerships.

The tax character of distributions paid during the years ended March 31, 2020, and March 31, 2019 were as follows:

	Year Ended	Year Ended
Distributions Paid From:	March 31, 2020	March 31, 2019
Ordinary Income	\$ 15,974,954	\$ 10,032,134
Return of Capital	466,880	
<b>Total Distributions Paid</b>	\$ 16,441,834	\$ 10,032,134

The Fund is required, in order to meet certain excise tax requirements, to measure and distribute annually, net capital gains realized during the twelve month period ending October 31. In connection with this requirement, the Fund is permitted, for tax purposes, to defer into its next fiscal year any net capital losses incurred from November 1 through the end of the fiscal year. Late year losses incurred after December 31 within the fiscal year are deemed to arise on the first business day of the following fiscal year for tax purposes. As of March 31, 2020, the Fund had no late-year or post-October losses.

At March 31, 2020, the Fund had no capital loss carryforwards, which reduce the Fund's taxable income arising from future net realized gains on investments, if any, to the extent permitted by the Internal Revenue Code, and thus will reduce the amount of distributions to shareholders which would otherwise be necessary to relieve the Fund of any liability for federal tax.

# **Note 7 – Commitments and Contingencies**

In the normal course of business, the Fund enters into contracts that provide general indemnifications by the Fund to the counterparty to the contract. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated; however, based on experience, the risk of loss from such claims is considered remote.

NOTES TO FINANCIAL STATEMENTS

March 31, 2020 (Continued)

#### Note 8 – Line of Credit

The Fund has access to a \$25 million unsecured line of credit through an agreement with U.S. Bank. The Fund may temporarily draw on the line of credit to satisfy redemption requests or to settle investment transactions. Interest is charged to the Fund based on its borrowings at a rate per annum equal to the Prime Rate, to be paid monthly. Loan activity for the year ended March 31, 2020, was as follows:

Maximum Available Credit	\$25,000,000
Largest Amount Outstanding on an Individual Day	170,000
Average Daily Loan Outstanding	170,000
Interest Expense – 3 days	60
Loan Outstanding as of March 31, 2020	-
Average Interest Rate	4.25%

# **Note 9 – Securities Lending**

The Fund may lend up to 33 1/3% of the securities in its portfolios to brokers, dealers, and other financial organizations that meet capital and other credit requirements under terms of participation in a securities lending program administered by U.S. Bank N.A. The securities lending agreement requires that loans are collateralized at all times in an amount equal to at least 102% of the market value of the securities loaned. The Fund has the right under the terms of the lending agreement to recall the securities from the borrower on demand.

The borrower of any securities will pay the Fund any accrued income while the securities are on loan. The cash collateral received is invested in a money market fund which is redeemable on demand.

There are certain risks associated with securities lending, including the risk that the borrower may fail to return the securities on a timely basis or even the loss of rights in the collateral deposited by the borrower, if the borrower should fail financially. As a result the Fund may lose money.

As of March 31, 2020, the Fund had no securities on loan. The fees and interest income earned through the securities lending program are reflected in the Statement of Operations.

The Fund manages credit exposure arising from these lending transactions by, in appropriate circumstances, entering into master netting agreements and collateral agreements with third party borrowers that provide the Fund, in the event of default (such as bankruptcy or a borrower's failure to pay or perform), the right to net a third party borrower's rights and obligations under such agreement and liquidate and set off collateral against the net amount owed by the counterparty.

NOTES TO FINANCIAL STATEMENTS

March 31, 2020 (Continued)

# **Note 10 – Subsequent Events**

In preparing these financial statements, the Fund has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were available to be issued. Subsequent to the year end, the Fund has made the following distributions per share:

Record Date	Payable Date	Distributions
4/29/2020	4/30/2020	\$ 0.01956894
5/28/2020	5/29/2020	\$ 0.02483029

The recent global outbreak of COVID-19 has disrupted economic markets and the prolonged economic impact is uncertain. The operational and financial performance of the issuers of securities in which the Fund invests depends on future developments, including the duration and spread of the outbreak, and such uncertainty may in turn impact the value of the Fund's investments.

# **Note 11 – New Accounting Pronouncements**

In March 2017, the Financial Accounting Standards Board issued Accounting Standards Update No. 2017-08 ("ASU 2017-08"), "Receivables—Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities." ASU 2017-08 changed the amortization period for certain callable debt securities held at a premium. Specifically, it requires the premium to be amortized to the earliest call date. The Fund has adopted the provisions of ASU 2017-08 and has concluded that the change in accounting principle does not materially impact the financial statement amounts.

# REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

# To the Board of Trustees of Trust for Advised Portfolios and the Shareholders of Bramshill Income Performance Fund

#### **Opinion on the Financial Statements**

We have audited the accompanying statement of assets and liabilities of Bramshill Income Performance Fund, a series of shares of beneficial interest in Trust for Advised Portfolios (the "Fund"), including the schedule of investments, as of March 31, 2020, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended and for the period from April 11, 2016 (commencement of operations) through March 31, 2017, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of March 31, 2020, and the results of its operations for the year then ended, the changes in its net assets for each of the years in the two-year period then ended and its financial highlights for each of the years in the three-year period then ended and for the period April 11, 2016 through March 31, 2017, in conformity with accounting principles generally accepted in the United States of America.

#### **Basis for Opinion**

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Fund in accordance with the U.S. federal securities law and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audit we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risk of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of March 31, 2020 by correspondence with the custodian and brokers, or by other appropriate auditing procedures where replies from brokers were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

BBD. LLP

BBD,UP

We have served as the auditor of one or more of the Funds in the Trust for Advised Portfolios since 2010.

Philadelphia, Pennsylvania June 1, 2020

# ADDITIONAL INFORMATION

March 31, 2020 (Unaudited)

# Form N-Q

The Fund files its complete schedule of portfolio holdings for the first and third quarters of each fiscal year with the SEC on Form N-Q or Part F of Form N-PORT (beginning with filings after March 31, 2020). The Fund's Form N-Q or Part F of Form N-PORT are available without charge by visiting the SEC's Web site at www.sec.gov and may be reviewed and copied at the SEC's Public Reference Room in Washington D.C. You may obtain information on the operation of the Public Reference Room by calling (800) SEC-0330.

# **Proxy Voting**

You may obtain a description of the Fund's proxy voting policy and voting records, without charge, upon request by contacting the Fund directly at 1-877-BRAMS18 or on the EDGAR Database on the SEC's website at www.sec.gov. The Fund files its proxy voting records annually as of June 30, with the SEC on Form N-PX. The Fund's Form N-PX is available without charge by visiting the SEC's website at www.sec.gov and may be reviewed and copied at the SEC's Public Reference Room in Washington D.C. You may obtain information on the operation of the Public Reference Room by calling 1-800-SEC-0330.

#### **Tax Information**

For the year ended March 31, 2020, certain dividends paid by the Fund may be subject to a maximum tax rate of 23.8%, as provided for by the Jobs and Growth Tax Relief Reconciliation Act of 2003. The percentage of dividends declared from ordinary income designated as qualified dividend income was 28.07%.

For corporate shareholders, the percent of ordinary income distributions qualifying for the corporate dividends received deduction for the year ended March 31, 2020 was 26.12%.

The Percentage of taxable ordinary income distributions that are designated as short-term capital gain distributions under Internal Revenue Section 871(k)(2)(C) for the Fund was 0.68%.
