# FIRM OVERVIEW

- Bramshill Investments, LLC, founded in 2012, is an alternative asset manager focused on value investing in fixed income and debt securities.
- Bramshill exercises a philosophy of value investing in income-producing securities. Bramshill invests in securities that the Firm believes are inexpensive relative to the underlying risk and are positioned to deliver attractive risk-adjusted returns.
- Bramshill has strict self-imposed risk limits which can potentially contribute to long-term returns.
- Bramshill has grown from approximately \$400 million AUM to approximately \$4.6 billion AUM\* in the past six years.
- The Bramshill Income Performance Fund is an unlevered tactical, opportunistic fund which seeks to maximize total return across targeted US fixed income asset classes with a philosophy of value investing.
- Art DeGaetano, the Founder of Bramshill, has managed the Bramshill Income Performance Fund since its inception in 2016. He has over 30 years investment experience in fixed income within long-only and long-short investment vehicles.
- Bramshill has a seasoned investment team as 11 of its 14 members have over 15 years of experience in the markets.

*These awards and nominations are not to be construed as a testimonial or endorsement concerning Bramshill or its advisory services. Entry is available to U.S. and Canadian managers that have a minimum \$50 mm in AUM and submit an application and performance data for consideration. A judging panel consisting of leading institutional and private investors and industry experts will judge the applicants based on performance, qualitative information and structural criteria.*

\*AUM is higher than actual capital contributions due to an allocation to another internally managed vehicle

# INCOME PERFORMANCE FUND OVERVIEW

FUND	INCEPTION	INVESTED MARKETS	FUND AUM*	CHARACTERISTICS	VEHICLE
<b>INCOME PERFORMANCE FUND</b> (Long-Only Alternative Fixed Income Fund)	<b>APR 2016</b>	Traditional: US Corporates (Investment Grade & High Yield) and US Treasuries. Non-Index Asset Classes: US Preferred Securities, Closed End Funds, Municipal Bonds	\$925 mm	Opportunistic, tactical fund focused on dynamically allocating capital among asset classes with a focus on probability of loss	40 Act Fund

\*As of December 31, 2021

### THE INCOME PERFORMANCE FUND IS A FIXED INCOME FUND THAT SEEKS TO MAXIMIZE TOTAL RETURN ACROSS VARIOUS ASSET CLASSES INCLUDING CORPORATE CREDIT, PREFERRED SECURITIES, AND MUNICIPALS.

- Bramshill seeks investments in high quality income-generating securities within investment grade corporate bonds, high yield bonds, municipal bonds, preferred stock and U.S. Treasuries that maintain strong credit metrics and are priced at an intrinsic discount
- Aims to generate total return by combining an analytical risk-reward pricing model with the power of compounding income
- Actively manages the portfolio by rotating among asset classes and tactically hedging during various interest rate and market environments
- Seeks to identify relative value across asset classes and capture opportunities within the corporate, US Treasury, municipal and preferred security markets
- The Fund maintains a more conservative profile and aims to prevent against principal drawdowns
- The Fund is benchmark agnostic allowing flexibility across asset classes, duration, and credit quality

**FUND**

**CORE APPROACH**

**ROTATE ACROSS FIVE UNCORRELATED ASSET CLASSES**

Investment Grade corporates bonds, High Yield corporate bonds, Preferred securities, Municipal bonds, US Treasuries

**ROTATE ACROSS VARIOUS STRUCTURES**

10yr non-call 5yr high yield, Floating rate preferreds, 20yr muni, BB corporates

**ROTATE CREDIT EXPOSURE**

Ratings AA to B, Oil sector vs. Financial sector, Senior vs. Subordinated

**ROTATE DURATION AND CURVE EXPOSURE**

Historical low 1.6 – Historical high 8.4

**ROTATE INTO LOW VOLATILITY SECURITIES**

US Treasuries, Short term corporates, Currently callable preferreds

**SELL BUTTON**

The performance shown represents past performance. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. Investment results and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. To obtain performance data current to the most recent month-end, call 877-272-6718. As of the date of the Fund's current prospectus, the gross expense ratio of the Fund's Institutional Shares was 1.29% (including dividend and interest expense on short sales and acquired fund fees and expenses). The Adviser has contractually agreed to waive a portion or all of its management fees and pay Fund expenses (excluding taxes, leverage interest, brokerage commissions, acquired fund fees and expenses, portfolio transaction expenses, interest expense and dividends paid on short sales or extraordinary expenses) in order to limit the Total Annual Fund Operating Expenses to 1.10% of average daily net assets of the Fund's Institutional Class (the "Expense Cap"). This arrangement is in effect through at least July 31, 2022. After that time, the arrangement may be terminated or amended at any time by the Board upon 60 days' notice to the Adviser or by the Adviser with the consent of the Board. The gross expense ratio is as of the most recent prospectus and is applicable to investors.

FUND

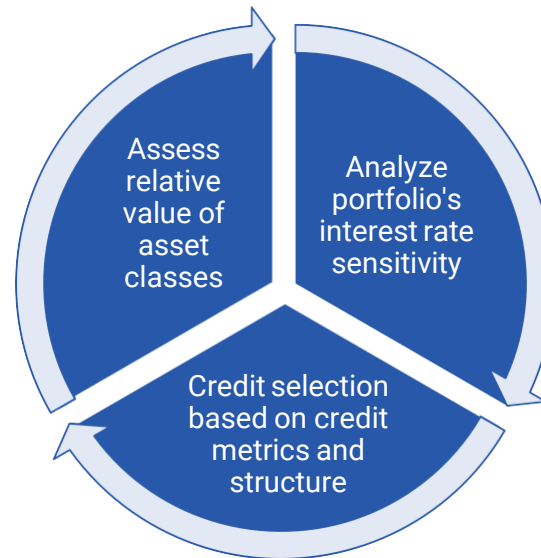

# INVESTMENT PROCESS

## INVESTMENT IDEA GENERATION

## TOP

- Evaluate opportunities across taxable, tax-free, and equity oriented income markets
- Rotate the portfolio among various asset classes based on undervalued and overvalued metrics
- Capitalize on opportunities in the market where securities and sectors are mispriced based on relative value assessment
- Analyze price and risk of a security vs. similar securities within a sector

## DOWN

- Interpret Fed policy
- Analyze how interest rate moves, both directional and within the term structure, will impact each potential position in the portfolio
- Use hedges and security selection to adjust portfolio

## BOTTOM UP

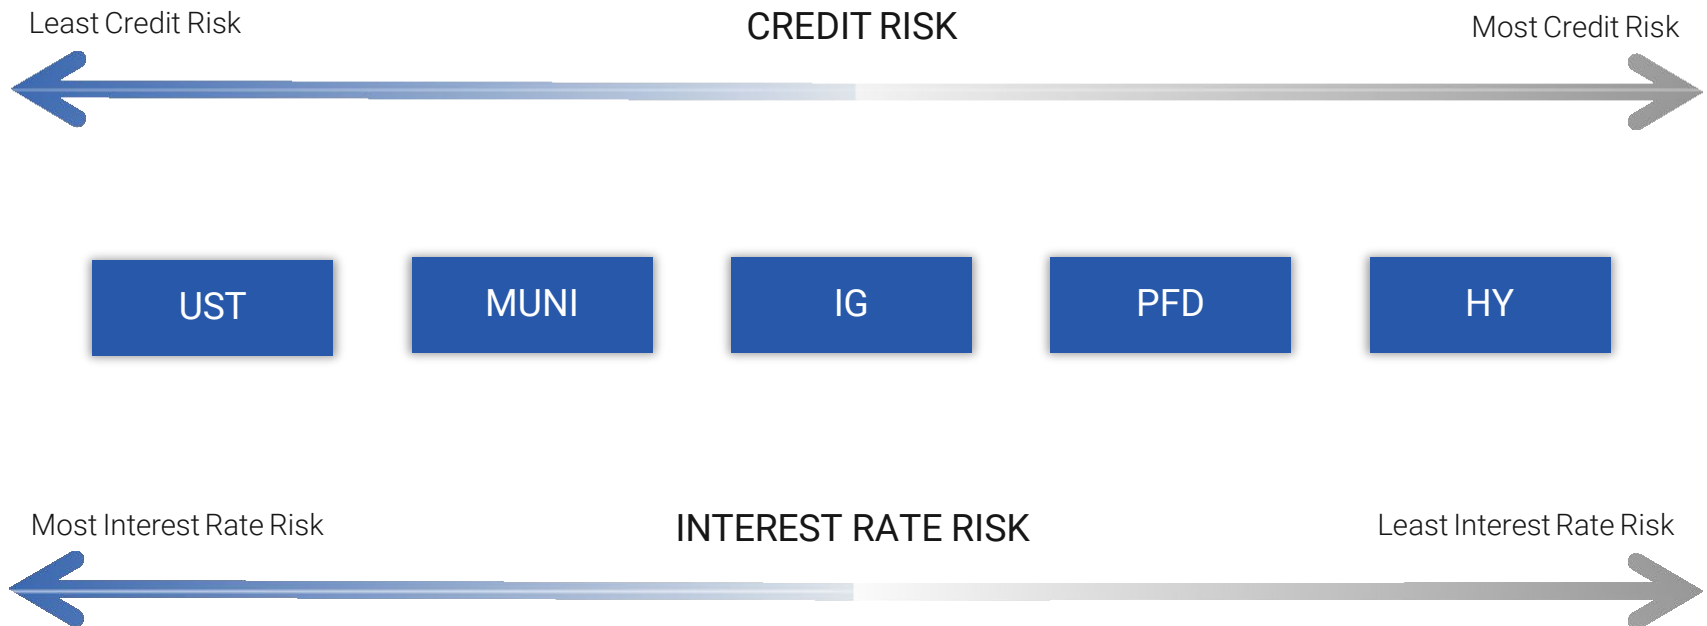

- Assess securities using fundamental credit analysis, free cash flow generation and stress test/recovery analysis
- Pursue investments that are secured by assets or have strong cash flows tied to revenue streams
- Invest in securities priced with a favorable risk/reward on recovery
- Establish positions in large liquid credits, avoiding credit derivative and private placements
- Constantly assess relative value based on performance target analysis

## INVESTMENT PROCESS

# T O P D O W N - M A C R O O V E R L A Y

Different risk profiles across Asset Classes present opportunities to shift portfolio based on interest rate and credit market views. This begins with a top-down assessment of the asset classes in which the fund invests.

# ASSESSING OPTIMAL INTEREST RATE RISK

Fixed Income asset classes can perform in an uncorrelated manner during various interest rate environments. Furthermore, different security structures within each asset class can provide a wide range of total return. Accordingly, the Bramshill Income Performance Fund periodically shifts its duration opportunistically seeking to generate optimal risk-adjusted returns. The following example displays Bramshill's ability to shift positioning at both the asset class level and security level in order to generate alpha in a rising rate environment.

**Rate Rise Period (12/29/17 – 11/5/18)** – During 2018, the US 10-Year Treasury rose 81bps from a low of 2.4% to 3.22%. The Bloomberg Barclays 20+ Year US Treasury Index was down -9.3% during this time. However, not all fixed income asset classes and not all security structures suffered.

**Asset Class Shift:** Increased exposure to fixed-to-float preferred securities. Decreased exposure to long duration perpetual preferreds. The below grid shows the extreme difference in total return between five fixed income asset classes during this time frame.

ASSET CLASS	TOTAL RETURN (12/29/17 – 11/5/18)
US TREASURY	-9.3%
PFD	-0.7%
HIGH YIELD	+1.2%
SR. FLOATING LOANS	+4.1%
IG CORPORATES	-3.8%

**Security Structure Shift:** Within the same asset class, various structures make security selection of paramount importance. In order to shorten duration, Bramshill often shifts into High-Coupon / Short Call preferreds, fixed to float preferreds or other short duration corporates. The following securities illustrate the difference in total return between credits in the same asset class during this time frame:

SECURITY	SECURITY TYPE	TOTAL RETURN (12/29/17 – 11/5/18)
VVR	CLOSED-END FUND	-0.2%
MHN	CLOSED-END FUND	-9.3%
WFC 5.2 PFD	PFD	-3.9%
WFC FLOAT PFD	PFD	+5.7%
NWL 3.15 4/1/21	CORPORATE BOND	+0.50%
NWL 5.5 4/1/46	CORPORATE BOND	-21.2%

*These examples are provided for illustrative purposes only and there is no guarantee that Bramshill will be able to achieve results similar to those above. Pricing source = Bloomberg. Asset Class Return source = Bloomberg. Asset Class Returns determined by Indices = Bloomberg Barclays 20+ Year US Treasury Index, S&P Preferred Stock Index, Bloomberg Barclays US Corporate High Yield Bond Index, S&P/LSTA Leveraged Loan Index, Bloomberg Barclays US IG Corporate Bond Index*

## INVESTMENT PROCESS

# ASSESSING OPTIMAL INTEREST RATE RISK

The chart below shows the performance of the Fund in rising rate environments. The Fund's diversification allows for positive growth in various interest rate environments. The positioning of Bramshill's investments in the portfolio have been able to minimize interest rate volatility and have historically outperformed in rising rates environments.

	PERIOD 1 8/1/2016 - 12/31/2016	PERIOD 2 9/1/2017 - 10/31/2018	PERIOD 3 1/1/2021 - 3/31/2021
<b>BRAMSHILL INCOME PERFORMANCE FUND</b>	<b>0.7%</b>	<b>3.0%</b>	<b>-0.3%</b>
Bloomberg Barclays U.S. Aggregate Bond Index	-3.1%	-2.0%	-3.4%
Bloomberg Barclays U.S. Treasury 20+ Year Index	-14.5%	-6.6%	-13.9%

The performance shown represents past performance. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. Investment results and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. To obtain performance data current to the most recent month-end, call 877-272-6718. As of the date of the Fund's current prospectus, the gross expense ratio of the Fund's Institutional Shares was 1.29% (including dividend and interest expense on short sales and acquired fund fees and expenses). The Adviser has contractually agreed to waive a portion or all of its management fees and pay Fund expenses (excluding taxes, leverage interest, brokerage commissions, acquired fund fees and expenses, portfolio transaction expenses, interest expense and dividends paid on short sales or extraordinary expenses) in order to limit the Total Annual Fund Operating Expenses to 1.10% of average daily net assets of the Fund's Institutional Class (the "Expense Cap"). After that time, the arrangement may be terminated or amended at any time by the Board upon 60 days' notice to the Adviser or by the Adviser with the consent of the Board. The gross expense ratio is as of the most recent prospectus and is applicable to investors. Diversification does not assure a profit or protect against a loss in a declining market. Past performance is not indicative of future results. Performance results are calculated net of fees. Please consult the last pages of this presentation for certain performance disclosures.

## INVESTMENT PROCESS

# CREDIT SENSITIVITY

During periods of equity market stress since the fund's inception, BRMSX has produced returns with shallower drawdowns and less volatility than the US Corporate High Yield market. This performance has been accomplished with a -0.01 correlation to the U.S Treasury market since inception (April 2016).

	<b>PERIOD 1</b> 2/1/18 - 2/28/18	<b>PERIOD 2</b> 10/1/18 - 12/31/18	<b>PERIOD 3</b> 5/1/19 - 5/31/19	<b>PERIOD 4</b> 2/1/20 - 3/31/20
<b>BRAMSHILL INCOME PERFORMANCE FUND</b>	<b>-0.6%</b>	<b>-2.3%</b>	<b>-0.5%</b>	<b>-8.2%</b>
Bloomberg Barclays U.S Corporate High Yield Bond Index	-1.4%	-4.5%	-1.2%	-12.7%
S&P 500 TR	-6.1%	-13.5%	-6.4%	-19.6%

Source: Bloomberg

## INVESTMENT PROCESS

# BOTTOM UP - CREDIT SELECTION

- Follow a consistent and fluid Investment Process for Credit Selection
- Every position is assessed both at the security level and by its potential impact on the portfolio
- Research write-ups on every position stored via internal software and continuously updated with news, earnings, and any relevant fundamental changes

### IDENTIFYING AND SOURCING THE CREDIT OPPORTUNITY

- Idea generation via new issues, credit events and industry trends
- Proprietary models screen for potential opportunities
- Macroeconomic themes filter all credit opportunities
- Credit and yield spread historical analysis
- Event dislocations
- Business cycle analysis

### SYNCHRONIZE MACRO OUTLOOK WITH CREDIT OPPORTUNITIES

- Event driven additions or subtractions to portfolio
- Fundamental improving or declining sector credit metrics
- Sector themes evaluated and incorporated
- Deflation/inflation analysis

### SECURITY ANALYSIS AND CREDIT METRICS

- Absolute and Relative Leverage Modelling
- Liquidity/Free Cash Flow/ Debt Ratios / and Interest Coverage Ratios
- Dynamic Balance Sheet and Cash Flow Analysis
- Risk / Reward Analytics of each position
- Beta Analysis of each security
- Relative Value within Entire Credit Universe

# STRATEGY IMPLEMENTATION

Converting an idea into a position is a crucial step in Bramshill's investment process. The following factors are considered prior to including a research idea into the portfolio.

# PORTFOLIO AND RISK MANAGEMENT

Risk Management is a top priority at Bramshill. We believe managing downside risk is essential to making solid risk-adjusted investments

## PORTFOLIO CONSTRUCTION

- Apply risk metrics for credit quality, fundamentals, and sizing of positions
- Manage/adjust duration based on macro/rate view
- Daily trading desk meeting regarding positioning, topical news
- Weekly PM/analyst meeting to discuss macro data points, upcoming economic and earnings calendar, quantitative model readings, portfolio positioning

## SCENARIO ANALYSIS

- Utilizing quantitative software, rigorously run portfolio through various scenarios
- Stress test for liquidity risk, market risk, and event risk
- Run scenarios of interest rate shocks, credit spread dislocations and equity market corrections
- Evaluate portfolio positioning for best potential risk-adjusted returns

## RISK MANAGEMENT

- Asset class / sector concentration limits
- Volatility adjusted position sizing
- Stop-losses on individual positions
- Credit exposure limits
- Monthly Risk Management committee meeting to employ and enforce stop losses (3 investment and 3 non-investment personnel)

## RISK MANAGEMENT

# RISK PARAMETERS

### ASSET ALLOCATION EXPOSURE

US Rates	Minimum 0%, Maximum 50%
IG Corporates	Minimum 0%, Maximum 80%
HY Corporates	Minimum 0%, Maximum 40%
US Municipals	Minimum 0%, Maximum 80%
Preferred Equity	Minimum 0%, Maximum 70%
Closed-End Fund	Minimum 0%, Maximum 15%
Exchanged-Traded Fund	Minimum 0%, Maximum 25%

### CREDIT RATING EXPOSURE (AT PARENT LEVEL)

- Up to 80% in investment grade corporate bonds
- Up to 40% in high yield bonds which are defined as corporate bonds rated below Baa by Moody's, or equivalent rated by S&P or Fitch.
- Up to 70% in preferred stocks
- Up to 80% in U.S. municipal bonds
- Up to 100% in U.S. Treasuries
- Up to 15% in fixed income closed-end funds
- Up to 25% in fixed income ETFs

### SINGLE ISSUER EXPOSURE

- Maximum 10% (composite rating A- or lower)
- Maximum 20% (composite rating A or higher)

### STOP LOSS

- Once a full position has been initiated. 8% stop loss on first half of position; 4% stop loss on second half of position; to result in an approximate 10% weighted average stop loss on a full position

### POSITION LIMIT

- Target approximately 50 investments

*\*The Risk Parameters, including exposure and position limits and stop losses, are non-binding and implementation is subject to the sole discretion of the portfolio managers.*

## BIOGRAPHIES

# SENIOR INVESTMENT TEAM

### **Art DeGaetano – Founder and CIO, 30 years experience**

Mr. DeGaetano is the Chief Investment Officer and Founder of Bramshill Investments. Prior to founding Bramshill, in 2012, Mr. DeGaetano was a Senior Portfolio Manager at GLG Partners LP where he not only managed the predecessor to the Bramshill Income Performance Strategy, but also managed a levered US credit portfolio for the GLG Market Neutral Fund. Combined Mr. DeGaetano had approximately \$375 million in assets under management for GLG Partners LP. Prior to GLG Partners in 2007, Mr. DeGaetano was a Managing Director and Head of US Credit Trading at RBS Greenwich Capital from 2005 through 2006. He traded and oversaw the credit trading desk, comprised of 14 traders across corporate bonds, credit default swaps and index products from investment grade to high yield averaging a \$4 billion gross position. Prior to RBS Greenwich Capital, he traded credit for 12 years for Bear Stearns & Co. Inc. He was a Senior Managing Director and the Head Trader on the high yield trading desk from 2000 through 2004. He managed a group of 4 traders along with trading his own positions during this period overseeing a gross position of approximately \$1 billion. His expertise has been in high beta sectors such as telecom, utilities, and special situations. Prior to trading high yield, he was a Managing Director on the investment grade trading desk at Bear Stearns from 1992 through 1999. Mr. DeGaetano has a B.A. from Colgate University. Art is a member of the Columbus Citizens Foundation and actively supports student-athlete programs and scholarships through a family foundation.

Mr. Forns is a Certified Public Accountant and is licensed in the State of New Jersey.

# IMPORTANT DISCLOSURES

Investors should carefully consider the Fund's investment objectives, risks, charges and expense before investing. The prospectus contains this and other important information about the Fund and may be obtained at [www.BramshillFunds.com](http://www.BramshillFunds.com) or by calling (877)-272-6718. Please read the prospectus carefully before investing.

Mutual fund investing involves risk. Principal loss is possible. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investment by the Fund in lower-rated and non-rated securities presents a greater risk of loss to principal and interest than higher-rated securities. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks are greater in emerging markets. Closed-End Funds and ETFs are subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of the shares may trade at a discount to its net asset value ("NAV"), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a Fund's ability to sell its shares. In addition, the Fund may incur higher expenses than if the Fund did not invest in these types of securities. The Fund may make short sales of securities, which involves the risk that losses may exceed the original amount invested. While the Fund is no-load, management fees and other expenses still apply. Bramshill Investments, LLC is the investment adviser to the Fund.

The Fund is distributed by Quasar Distributors, LLC

The Barclays Capital U.S. Aggregate Bond Index is an index which currently includes U.S. Treasuries, government related securities, corporate bonds, agency mortgage-backed passthroughs, consumer asset-based securities, and commercial mortgage-backed securities. The Wilshire Liquid Alternative Relative Value Total Return Index measures the performance of the relative value strategy component of the Wilshire Liquid Alt Index (WLIQA). Created in 2014, with history to 12/31/99, the Index is a broad measure of the liquid alternative relative value market. The S&P 500 Index or the Standard & Poor's 500 Index is a market-capitalization weighted index of the 500 largest US publicly traded companies. The Bloomberg Barclays US Treasury 20+ Year Index measures US dollar- denominated, fixed rate, nominal debt issued by the US Treasury with 20+ years to maturity. The Bloomberg Barclays US Corporate High Yield Bond Index measures the US dollar denominated, high-yield, fixed rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. The Bloomberg Barclays US Corporate Bond Index measures the investment grade, fixed-rate, taxable corporate bond market. It includes USD denominated securities publicly issued by US and non-US industrial, utility and financial issuers.

References to asset class correlations are represented by the following: we are currently using the S&P 500 Index to represent equities; the S&P Preferred Stock Index to represent preferred stocks; The Bloomberg Barclays US Corporate High Yield Bond Index to represent high yield corporate bonds; the ICE U.S. Treasury 20+ year TR Index to represent U.S. treasuries; and The Bloomberg Barclays US Corporate Bond Index to represent investment grade corporate bonds.

## Important Definitions

**Yield curve:** A yield curve is a line that plots yields (interest rates) of bonds having equal credit quality but differing maturity dates. The slope of the yield curve gives an idea of future interest rate changes and economic activity. **Free cash flow:** Free cash flow (FCF) represents the cash a company generates after accounting for cash outflows to support operations and maintain its capital assets. Unlike earnings or net income, free cash flow is a measure of profitability that excludes the non-cash expenses of the income statement and includes spending on equipment and assets as well as changes in working capital from the balance sheet. **Stop loss:** A stop-loss order is an order placed with a broker to buy or sell a security when it reaches a certain price. Stop-loss orders are designed to limit an investor's loss on a position in a security and are different from stop-limit orders. **Correlation:** is a statistic that measures the degree to which two securities move in relation to each other. **Beta:** Beta is a measure of the volatility—or systematic risk—of a security or portfolio compared to the market as a whole. **Alpha:** Alpha is a measure of performance, indicating when a strategy, trader, or portfolio manager has managed to beat the market return over some period. **Bps (basis points):** Basis points (BPS) refers to a common unit of measure for interest rates and other percentages in finance. One basis point is equal to 1/100th of 1%, or 0.01%, or 0.0001, and is used to denote the percentage change in a financial instrument. **Duration:** Duration is a measure of the sensitivity of the price of a bond or other debt instrument to a change in interest rates.
